EDUCATION

SJB Institute of Technology | B.E. Computer Science & Engineering | 2023–2027 | CGPA: 9.54/10
Sri Kumaran's Home Composite PU College | PCMC | 2021–2023 | 92%
Vikas High School | SSLC | 2020–2021 | 90.08%

PROFESSIONAL SUMMARY

Computer Science undergraduate with a hands-on experience developing AI, web, and IoT applications using Python, Django, Flask, Java, and SQL. Passionate about Artificial Intelligence, Machine Learning, Cybersecurity, and Full-Stack Development.

TECHNICAL SKILLS

Languages: Python, Java, C
Frameworks: Django, Flask
Libraries: NumPy, Pandas, Matplotlib, scikit-learn
Databases: MySQL, SQLite
Core: AI, ML, NLP, DSA, OOP, DBMS, Software Engineering, Data Analytics
Tools: Git, GitHub, VS Code, IntelliJ IDEA, Arduino IDE

PROJECTS

MAPIS: (GitHub: github.com/sanjananarendra11/MAPIS)

Built an AI-powered phishing detection system using Machine Learning and Natural Language Processing to analyze URLs, domains, and content, featuring an explainable multilayer risk-scoring framework for real-time threat detection.

Campus Event Lifecycle Management System: (GitHub: github.com/sanjananarendra11/campus-event-lifecycle)

Developed a Django-based event management platform with registration, payment verification, QR-based attendance, an admin dashboard, and automated PDF certificate generation using Django ORM and SQLite.

AI-Powered YouTube Shorts Generator: (GitHub: github.com/sanjananarendra11/ai-youtube-shorts-generator)

Created an AI-powered application that converts long-form videos into YouTube Shorts by automating content extraction and editing, reducing manual effort and improving content creation efficiency.

IoT-Based Smart Street Light System: (GitHub: github.com/sanjananarendra11/intelligent-street-light-system)

Designed and implemented an Arduino-based smart street lighting system using LDR, IR sensors, RTC, Bluetooth, and LCD to automate lighting based on ambient light, vehicle movement, scheduling, and mobile control.

CERTIFICATIONS

- NPTEL (Elite): Introduction to Industry 4.0 & IIoT
- NPTEL (Elite): AI in Human Resource Management
- NPTEL (Elite): Economics of Innovation
- Skill India: Data Mining | AI Data Engineering Analyst | AI DevOps Analyst

HACKATHONS & WORKSHOPS

- TechFusion 2.0 (24-Hour National Hackathon)
- Green Business CASE-A-THON 2025
- Django Semi-Hackathon
- Workshop on Data Visualization Techniques
